Get Started Guide

¹ Terms & Conditions and an Important Information booklet are accessible in electronic format on the device.

Before You Start

▶ Install the Battery

1. Insert the battery into the opening on the bottom of the device. Make sure the connectors align.
2. Slide the back cover into place until it clicks.

▶ Charge the Battery

1. Plug the USB to Micro B cable into the device.
2. Plug the other end of the cable into the AC adapter and plug the adapter into an electrical outlet.
3. Charge until the battery indicator meter is full ()

▶ Get Ready

1. Make sure you are in an area covered by the Sprint 3G or 4G network (not roaming).
2. Make sure your computer's Wi-Fi (wireless network connection) mode is turned on.
3. Make sure your device is set up on your Sprint account (sign on to your account at sprint.com to verify).

Get Connected

► Power Up the Device

If the device is not powered on, press and hold the Power button on top of the device for at least two seconds.

- The device will automatically activate. You will see “Connect your computer to WiFi network” on the display screen when it’s finished.

► **Wirelessly Connect Your Computer**

After it's activated, your Overdrive Pro displays the device name and password. You will need this information to connect your Wi-Fi devices to the network.

1. From your computer, display the Wireless Network Connections window, and then click **View Wireless Networks**.
2. Select the network name displayed on the device (for example, OverdrivePro123) and click **Connect**.
3. Enter your Wi-Fi password, which appeared on the device screen when the device powered on. (To display the password again, press the Power button briefly two times.)
4. Launch your computer's Web browser. You will see the Sprint Overdrive Pro setup page.
5. Click **The Internet** or **My Overdrive Pro's homepage** to keep your current device and network settings, or click **Set up my Overdrive Pro** and follow the prompts to customize your setup.
6. Navigate to another Web page to confirm your connection.
7. Ensure that your device's firmware is the most current. See "Updates" in this guide's Resources panel.
