

How to retrieve photos from the internal memory of the Lumens Ladibug document camera

1. Turn document camera power to **OFF** (but still connected to power).
2. On your laptop open **My Computer**.
3. Double click on the **Removable Disk (E:)**.
4. Double click on the **DCIM folder**.
5. Double click on the **100_LUMN folder**. You should see your jpg files.
6. Copy – Paste or drag jpg files to your desktop or a folder such as *My Pictures*.
